DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 and 46-49, drawn to promoting the wireless device to register, classified in class 455, subclass 438.
 - II. Claims 11-23, drawn to an authorization denial, classified in class 455, subclass 411.
 - III. Claims 24-26, drawn to checking a base station capable of operating in broadcast mode, classified in class 455, subclass 452.2.
 - IV. Claims 27-39, drawn to a schedule, classified in class 455, subclass 181.1.
 - V. Claims 40-45, drawn to a time-to-live allowance, classified in class 455, subclass 231.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I to V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II, III, IV and V have separate utility such as *casing the activation gateway to send an initial authorization request to a message server, checking a base station capable of operating in broadcast mode, using the broadcast request to make a schedule for the broadcast including the data associated with the broadcast access number over the radio channel and a*

temporary access number (TAN) including a time-to-live allowance. Respectively. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
